

$\mathbf{E}_1(\underline{a}, b, c)$

$\mathbf{R}(\underline{a}, g)$

The diagram illustrates a data flow. A central node  $\mathbf{R}(\underline{a}, g)$  is shown, where  $\underline{a}$  is in a yellow box and  $g$  is in a pink box. A green arrow originates from the yellow box and points to  $\mathbf{E}_1(\underline{a}, b, c)$ . Another green arrow originates from the pink box and points to  $\mathbf{E}_2(g, h, i)$ .

$\mathbf{E}_2(\underline{g}, h, i)$
